Air hydraulic cutting tool for steel band up to 50x2.5 mm

Lindova TA12 is an air hydraulic cutting tool. The design allows the user to work using rapid strokes and considerable force. The cut is burr-free.

TA12 is available for both fixed workstations and mobile use.

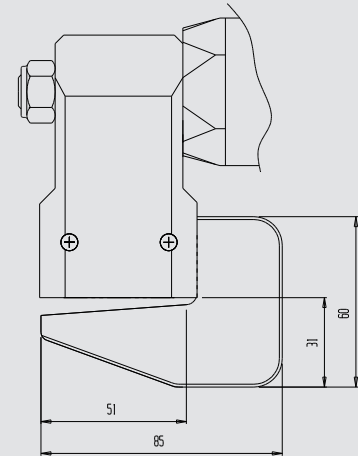

The tool is both light weight and well-balanced to minimize the strain on the user. The air hydraulics also mean that the tool runs silently and is completely vibration-free.

The tool has few moving parts and has an extremely high level of operational reliability. And because we both design and manufacture the TA12 Band Cutter ourselves, we can guarantee both a complete stock of spare parts and rapid service when required.
